

The “PQRST” method is a step-by-step plan that has been proven to raise students’ test scores.

## “P”— **PREVIEW** to identify the main ideas

**When you first get your book:**

Scan the **title page** and review the **table of contents**. How is the book organized?

Locate the **appendix**, **glossary** (a mini dictionary), **references** or **bibliography** and the **index**.

**When you start a new chapter** read the following:

- Chapter title and objectives
- Visual aids (graphs, images, text boxes)
- Headings and subheadings
- Chapter study questions and summary

## “Q”— **QUESTION** Ask questions such as:

- *What do I need to know from this assignment?*
- *What’s the purpose of this reading?*
- *How will this information be used in my course?*
- Create questions for each chapter title, heading or subheading in the chapter.

## “R”— **READ and REACT**

- Be an active reader—consider and question as you read.
- Mark in the book or on sticky notes to draw your attention to specific ideas. Highlight only main ideas or key words. Only about 10% of the text should be highlighted.

## “S”— **STATE or SUMMARIZE** to help information get into long-term memory

- This is one of the most important and valuable steps.
- After each paragraph or section, look away, and say in your own words what you just read. If you cannot, read it again with more focus and concentration.
- Summarize aloud and write it down.
- If it is still unclear, seek help from a peer, teacher, tutor at the Success Center, or online.

## “T”— **TEST**

- Answer the test questions you developed.
- Memory doesn’t happen by review only; retrieval of information requires practice.

# PQRST

⇒ **PREVIEW** – HEADINGS

⇒ **QUESTION** – WHAT DO YOU NEED TO LEARN?

⇒ **READ AND REACT**

⇒ **STATE/SUMMARIZE** WHAT YOU READ

⇒ **TEST** – ANSWER QUESTIONS FROM MEMORY
