**Comments:**  
 Each year, the paramedic program assesses all goals through exploring student performance on certification/licensure exams as well as student feedback on an accreditation mandated questionnaire. These findings are presented at the Advisory Committee meetings where trends are monitored or changes are suggested and eventually implemented. In the past 2 years, the program has also begun exploring the correlation between student performance on a comprehensive summative exam and performance on certification/licensure exams. Factors such as time and cut score are frequently looked as for potential policy changes.
