DESCRIPTION

Geography is the study of pattern and place on the earth's surface, that is, how the earth's surface is organized and used, and how its natural and cultural landscapes fuse into the powerful context of place. In SWIC Geography courses, students explore the processes that give rise to geographic patterns, examine the spatial outcomes of environmental and social forces, and learn to use state-of-the-art mapping software to display and analyze the world around us.

EMPLOYMENT OPPORTUNITIES

Geography majors and minors find work in the following areas:

Resource management	Urban and regional planning
Geographic information systems	Other fields in business, education, government and industry

Career Information for Geography Majors

COURSE SEQUENCE BY TERM

The following is the suggested course sequence by term. Please keep in mind:

- The course sequence is laid out by suggested term and may be affected when students enter the program at different times of the year.
- Initial course placement is determined by current district placement measures and/or completion of 100-200 level course and/or program requirements.
- Students should meet with an academic advisor about any concerns that may affect course enrollment.
- **This guide includes course suggestions for students undecided on where they plan to transfer. If you know where you are transferring to for your bachelor's, follow that institution's transfer requirements.**

ASSOCIATE IN ARTS: Geography

Student's Name: _____

Date: _____

Course #	Course Name	Requisites	Taken	Credits
Term 1				
ORIE 110	College Success Strategies			3
