Personal Interest

Cannabis Industry and Law

CAN 101 Belleville Campus

Cost: \$401

This course provides an overview of fundamental information about the history, law, and culture of cannabis cultivation and consumption. The course will not only familiarize students with legal issues surrounding the cultivation, production, and use of cannabis today, but also provide a backdrop of knowledge to help students understand the stigma and previous status of cannabis in the U.S. as well as its functions abroad. This course will also give students an overview of regulations and legal issues regarding cannabis cultivation and use throughout the U.S., and students will be able to distinguish between local, federal, and state laws. Students will review federal policies on prescribing and dispensing cannabis and focus

particularly on the laws concerning medical marijuana. Important terminologies related to the production/processing of cannabis will be utilized. Students will understand the distinctions between different varieties of cannabis products (e.g., hemp, CBD oil, and marijuana). The course will also emphasize potential career paths within the industry and what requirements may be necessary for different specializations.

Tuesdays, August 23 - December 13 5 to 7 PM

Drone [UAS] Pilot Certification

AVIA 126 Belleville Campus

Cost: \$227

An introductory course designed to provide the student with the training required to successfully accomplish the Federal Aviation Administration Unmanned Aircraft Systems knowledge exam. This course provides the student with an in-depth knowledge of the Federal Aviation Regulations along with law enforcement and privacy issues governing Unmanned Aircraft Systems. In addition he//she will receive classroom training covering airspace requirements, weather, weight and balance and safety management considerations.

Saturdays, September 24 & October 1 8 AM to 4:30 PM

Intro to Brewing Processes

BRW 101 Main Street Brewing Company, Belleville, IL

Cost: \$254

This is an introductory course covering the fundamental raw materials and methodologies utilized in the processes of brewing and fermentation. This course will not only provide an overview of brewing and fermentation operations, including handling, managing, storing, and sanitizing, but will also provide essential reinforcement of technical terminology as regards to ingredients, equipment, and standard vocabulary used in the industry. More specifically, students will learn about the distinctions in producing wine, cider, beer, and mead, among others.

Tuesdays, August 23 - December 13 5 to 6:50 PM

Intro to Horticulture
